Alpha Bot Installation

5 Easy steps to install SOL Decoder's Alpha-Generating Tools

**Step 1:**

Head over to our website - https://soldecoder.app/dao

Step 2:

At the topmost portion of the website, click the "Add Bot To Your Discord Server" button to invite our bot into your server

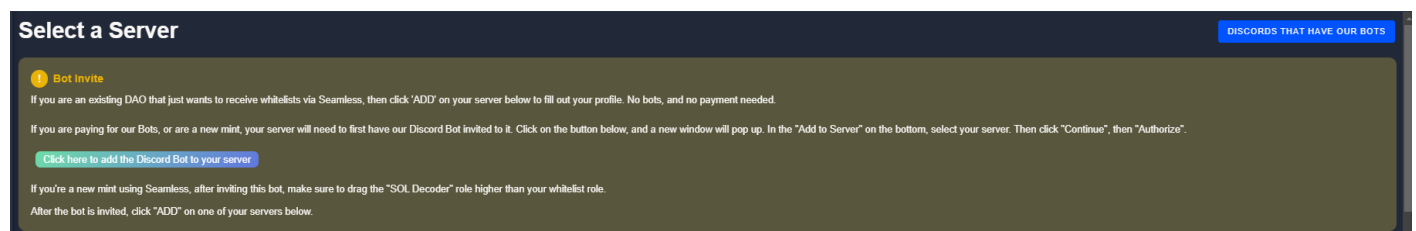

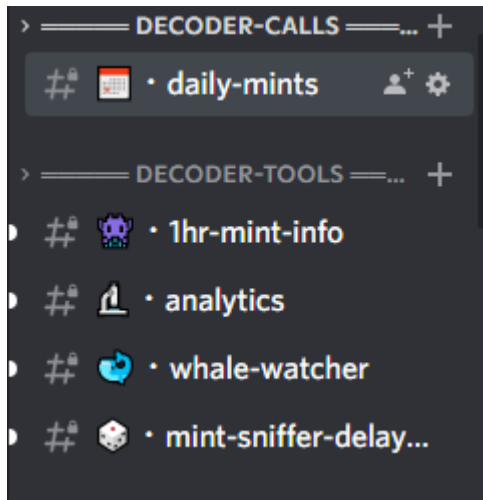

Step 3:

You will see a thumbnail of your server on our site. Click "ADD" on that specific server where you intend to have the bots installed

Step 4:

Make channels in your Discord server in line with the packages you've added. See examples below:

Analytics, Daily Mints, 1-hr Mint Info, Tomorrow's Mints, and Whale Watcher

Step 5:

Go to your newly created channels in Discord, and click "edit channel" found in the sidebar
1. Click permissions
2. Click "Add Members or Roles"
3. Search for "SOL Decoder"
4. Scroll down till "Text Permissions" and ensure the Bot has the following permissions in that channel

TEXT CHANNEL PERMISSIONS

Send Messages and Create Posts

Allow members to send messages and create posts in these channels.

Send Messages in Threads and Posts

Allow members to send messages in threads and posts under these channels.

Create Public Threads

Allow members to create threads that everyone in these channels can view.

Now, you're all set up! To verify successful installation, try sending a TEST MESSAGE. If in case this doesn't work, don't hesitate to contact a moderator from SOL Decoder. We don't live in a perfect world, this is why we'll be more than happy to assist.
