

Discord Overview

Below is a summary of our private Discord channels. These are locked down behind ownership of the NFT.

"Decoder Tools" channels are for those who hold 1 of the NFTs

- **holder-chat** - Talk **about whatever with fellow holders**

- **alpha-chat** - Talk NFTs and get/give alpha with fellow holders

possible-rug - It talks about the possible rugs in our SOL ecosystem

- **decode-bot-commands** - see below

- **mint bot commands** The commands on what to do when using our Mint bot is still on hold and we will update this soon!

- **follow-decoders** - Follow your fellow decoder!

Bot Commands that SOL Decoder holders can use in decode-bot-commands:

- **/search keyword:...** - Does a search on the Discords/Twitters

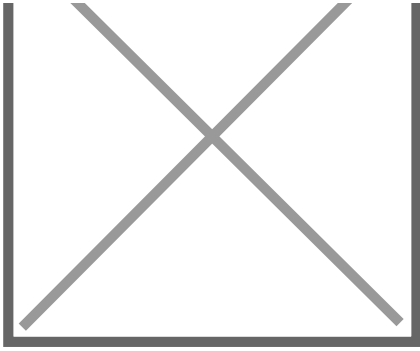

- **/cmid url:...** - Takes a URL that has a live mint, and returns mint information and the CMv2 ID on it

- **/token address:...** - Get Fox Token Market info from a WL token address

- **/wallet-tokens: address:...** - Get Fox Token Market info for all tokens in an address

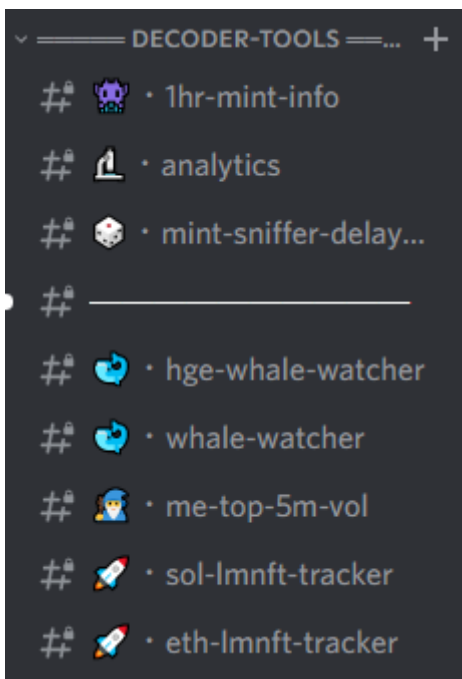

- **token_name:** Same as token, but fetches token data by the token's name rather than the token's address. Params: **name**: The token's name for which data needs to be retrieved

Daily Mints Example:

Decoder Calls

- **daily-mints** - Automated posts about upcoming NFTs, along with Twitter/Discord stats
- **alpha-calls** - Receive buy / sell signals and analysis for NFTs on MagicEden, given by our Alpha Caller
- **wl-giveaways** - Join raffles or FCFS giveaways to get on the whitelists for upcoming mints
- **self-roles** - Get new roles to get pinged on events in some of the above channels

- 1h-mint-info** - An hour before one of the daily mints comes out, this will show the mint info, recent searches from the Discords we parse, and the last two official tweets from their team
- **analytics**- Shows when names are added to WL tokens in Fox Token market along with charts
 - **mint-feed-delayed** - any mint URLs the bot picks up from various discords, but on a 15-minute delay. These are otherwise posted live to **mint-alerts** and **mint-sniffer** for 3 NFT holders
 - **Hge- whale-watcher** - HGE's wallet tracker channel alone. DAOs can now customize a single channel for a specific whale. This tool will give more options and less hassle for the DAO members to check on their favorite influencer/whale's recent actions

- **Whale - watcher** - a compilation of influencers/whales' wallets in a single channel. DAOs can customize the list of their preferred whale to help the DAO to be aware of the recent purchases of their favorite whales.
- **Me-top-5n-vol** - Track the latest trend on Magic Eden with our new ME Top Volume tool wherein the top collection during the 5-minute time frame will be posted to keep track of the volume action, floor price, listings, etc.
- **Sol-lmnft-tracker** - A tool that detects currently minting projects launching in LaunchMyNFT. This tool allows DAOs to identify current hyped launches in LMNFT in the Solana space.
- **Eth-** Showing top 7, by # online in Discord <https://soldecoder.app/schedule> museum projects launching in LMNFT. This will pr... e project.

 Supply: 5,000
 1.2
 21:00 UTC (in 3 hours)

day users will get the top 7 mints

sent to the Daily Mints channel. Other Discord servers may get this same channel sent to them for holding NFTs - create a ticket to sign up.

- The list of mints are gotten from HowRare and a Google Spreadsheet curated by experts
 - The Discord stats allow you at a quick glance you can see which Discords have "bots" in them by looking at the emojis, which compares the # online to # all in Discord
 - Twitter stats allow you to see how many followers they have, as well as number of interactions (sum of their comments / likes / retweets)
- Our Alpha caller will also discuss in detail the top mint(s) of the day, such as the below call on Okay Bears. Screenshots from our website will be included as well.

Akio.sol | SolDecoder 1 04/26/2022

Mint of the day

Okay Bears

Supply- 10,000

Mint Price- 1.5 sol

Do I even need to tell you guys to mint this tbh haha. Its been the most hyped mint on solana in recent times for sure. Expect at least 5 sol and could even reach up to 10 sol on secondary upon listing. Branding and marketing of this project is on point and art looks great as well. PFP and community projects are the meta right now and Okay Bears fits right into it. There will be tons of whales sweeping the project so expect good profits for minters. It's a no brainer that if you mint this you will get profits. Whitelist accounts were selling on discord for up to 5 sol in the past 2 weeks. Roadmap mainly focuses on marketing and community building to make Okay Bears a world renowned brand. There will be merch coming as well but roadmap is kind of vague as of the moment. Team is not doxxed but has that stopped projects like Degods and Cets from mooning?

If you don't have WL, might be a good idea to swipe some off paper hands listing low on secondary at initial listing. There have been some fud on them in the past 2 days but rest assured Magic Eden will be keeping the mint funds in escrow for a week so don't expect it to be a hard rug. There could be a possibility of a slow rug but not after at least a week so if you want to play it safe and take profits within a week its still a good play. This project is a no brainer if you have WL for it.

Based on our website, the discord activity for people talking about the project is through the roof. Almost everybody in the space has their eyes on this mint and tons of liquidity will be going into the project. **Project is a must mint.** Check out <https://soldecoder.app/search/okay> for more info!

Too much hassle keeping track of the top whales in the current space? Fear of missing out on bullish signs of projects? Worry no more!

Whale watchers allow DAOs to look out and find the purchases/listings/sale made by the top whales

in the space. DAOs can make a list of influencers' wallets and can separately create a single channel for an influencer's very own wallet.

"alpha-calls" channel example:

**Akio.sol | SolDecoder** 1 04/22/2022

Secondary Call

Project Name: Vault X
Supply: 3333
Mint Price: 0.9 sol
Current FP: 1.38 sol

This project's mint was under the radar and was a slow mint took hours to sell out but the next day immediately after sell-out the project pumped to a 3.9 sol FP. The project is essentially an escrow service wherein you can use their escrow to pay for services from a seller and vice versa. People would use this service to avoid getting scammed when buying or selling their services in the space. Think of a fiverr except in the crypto space. You can also buy/sell nfts and WLs OTC and more with their platform. Holding the Vault X NFT and staking will yield you passive income from the fees generated from the people using the escrow service. They just released the demo today and its really fire and seems easy to use. Could definitely see it going back to 3.9 sol FP and even higher than that when staking and the platform releases. More of a mid-long term hold as most of the solana space don't know much about the platform yet as most liquidity are going into PFP projects at the moment. Undervalued rn imo.

Here is a thread that shows more info. Watch the video in the end for a TLDR

"Decoder DAO+++" channels are for those who hold 3 of the NFTs

Mnt-alerts- see below

- **mint-sniffer**- Live feed that is similar to the above **mint-alerts-automated**, but shows mints even if it comes from a single Discord / Twitter, and shows duplicates of each URL
- **discord-inv-sniffer** - Detects when discord links are sent, with the same message having the words "whitelist" "wl" or "og" in it. Perhaps it could be a new NFT where you can get early whitelist to?
- **investment calls** - It focuses on quality low volume compared to most high volume low quality
- **degen-plays** - is ran by the whole kingdom staff - it just feeds directly into the channel. provides degen play
- **nft-calls** - Receive buy/sell signals on both SOL and ETH NFTs
- **crypto** - Receive buy/sell signals on crypto coins (BTC, ETH, and many alts)
- **stonks** - Receive buy signals for stocks, in the form of "Option" plays

mint-alerts - channel explanation

This is a live feed that parses links from the discords / twitters we watch. It alerts when any link could contain a new mint, before or while it is released. The mint must be linked from two discords before it shows up. Candy Machine ID and mint details are also posted, if found

The majority of the time, people in other discords will just post a link to a new mint, and not tag others. Using this, you no longer need to be in discord / twitter all day to catch certain hyped mints. You also have more confidence in these mints, as multiple discords will be linking / discussing them, thus showing hype and demand

Not listed are three additional channels from the "KingdomNFT" group - an ETH based group with a 2 ETH floor price for their lifetime membership. Live calls are sent everyday, bringing us to 9 total alpha callers!
