

Website Overview

First released in December 2021, our website is live at <https://soldecoder.app/>, and has since been used by hundreds of users. In order to gain access, you will have to be within our Discord and with a proper role (before the mint you can assign yourself a role in the #self-roles discord channel to get access, and after mint you'll have to hold the NFT to have the role).

Below is an overview of our current modules:

- **Search bar in the header** - Searching across Discord / Twitter
- **Engage 2 Earn/Quests** - Viewing quests in the DAOs you're in.
- **Seamless** - Obtaining Whitelist
- **Add bots/Seamless** - This page is to add bots in your server to avail our alpha bots
- **Today's Mints** - Autonomous page that lists all of the mints for that day
- **WL Token Market** - Tracking WL tokens listed on Fox Token Market
- **Mint Stats** - Viewing statistics on mints we automatically alerted
- **Stacked Line Search** - Graphing multiple words against each other to judge popularity / hype
- **Alerts** - Manage the various alerts that SOL Decoder provides

Search bar in the header

The screenshot displays the SolDecoder website interface. At the top, there is a header with a search bar (indicated by a red arrow) and a navigation menu. Below the header, the main content area is divided into several sections. The top section is titled "Today's Mints" and shows a date of "2022-10-12". Below this, there are three columns of mint listings. Each listing includes a project name, a supply amount, a price, a time, and a votes column. The projects listed are Wu-Gi-Win, Rotten Eggs, and PeyCatz. The Wu-Gi-Win listing shows a supply of 8888, a price of 0.0770, a time of 14, and votes of 174.6K. The Rotten Eggs listing shows a supply of 10000, a price of 2.50, a time of 16, and votes of 76.3K. The PeyCatz listing shows a supply of 8888, a price of 1.850, a time of 19:30, and votes of 54.3K. The bottom section of the page features a "Prime Eagles Society" listing with a supply of 8888, a price of 1.850, a time of 19:30, and votes of 54.3K. The interface is dark-themed and includes various icons and links throughout.

After doing a search in the header, you'll see graphs and results about your search term.

- Graphs on top will show you how popular your search word in the past five days is, and it searches across hand picked Discord channels (which we know have good alpha -- and currently it is 15+ Discords worth several hundred SOL) and Twitter.
- Search results will be shown below, and you can scroll through each page of 100 results, as well as click into any message to see what that Discord said after that message

How to use this page to gain an edge:

- You no longer need to hop around multiple discords and browse through Twitter to judge the hype of an upcoming mint or one of your existing NFTs. Lots of bullish messages from several discords will usually lead to a hyped mint ... and seeing hardly any posts about an NFT you minted two weeks ago could mean little demand (thus a slow decline in price)
- Additionally by clicking around the search results - you can read the alpha all these private DAOs are discussing. Some of these DAOs are only accessible by owning their NFT that can cost 100+ SOL (which the vast majority of NFT traders don't have to spend on a single NFT). We are aggregating all of this data and letting you very easily access it all from one spot.

Version 1.0

Still in testing in the SOL Decoder Discord, we aim to incentivize people to Engage with their NFT communities in three different ways. All of these will be available to any other Discord in the near future.

- Chat 2 Earn: Chat within Discord to gain Experience Points (XP) and level up
- Raid 2 Earn: Like and retweet a tweet to gain XP
- Daily / Weekly Quests: Complete quests in order to gain XP

There are 2 Blockchain that we're following Solana and Ethereum. Click Solana for SOL daily mints and Ethereum for ETH daily mints.

- Clicking on "Today's Mints" (in the sidebar) shows a page to view info on mints releasing today (all info. is automatically populated)
- Projects must have > 2,000 Discord members and > 1,000 Twitter followers before showing up on the list
 - "# Tweet Interactions" gets an average of the Comments / Likes / Retweets (over the last 5 tweets), and adds them
 - You can search through the table in the top right, and page through the data on the bottom right

How to use this page to gain an edge:

- With 20-40 mints coming out everyday - you need only pay attention to the most followed ones (those with most discord / twitter followers), and you can combine it with a search in the website to judge their hype. If they have a high follow count & high hype from search, and optionally if they have a lower supply, then more often than not it leads to a good mint.

Fox WL Token Market

View information about the Fox Token Market website, which is used to buy and sell whitelist tokens for upcoming mints

-  - Click this on the top right of the table, to filter the table to only the whitelist tokens in your wallet. You may either connect your wallet in the top right of the site, or add 1-3 wallets with the "+" button discussed below
-  - Used with the above "View My Tokens", use this to filter the table to tokens that are on multiple wallets. You may add up to three wallets to watch
-  - Use this if a token on the Fox WL Token Market doesn't have an official name yet, and you know for certain what the name of the token is
- Click the chart image on the left to show a Price, Listings, and Sales history charts for that token

How to use this page to gain an edge:

- Perform technical analysis on the charts (in conjunction with the # of listings) to see when to buy a new token, or sell one of yours. View past tokens that aren't listed anymore to identify trends as it relates to the mint times for those tokens
- Use this along with the alerts in Discord to be notified when new tokens are listed, so you can be among the first to buy in to a hyped token, or the first to sell a token at a high price
- Save time by doing **one click to see all of the WL tokens on Fox Token Market and their prices on 3 of your wallets**. Send these tokens to the trash, and soon get alerts on any new WL tokens being added to your wallet

This shows price updates / summaries from our discord's #mint-alerts channel, so you can see how we did in the past. As a reminder, this channel is live feed that parses links from the discords / twitters we watch. It alerts when any link could contain a new mint, before or while it is released. The mint must be linked from two discords before it shows up.

As a reminder of what the #mint-alerts channel is - this is a live feed that parses links from the discords / twitters we watch. It alerts when any link could contain a new mint, before or while it is released. The mint must be linked from two discords before it shows up. Candy Machine ID and mint details are also posted, if found

The majority of the time, people in other discords will just post a link to a new mint, and not tag others. Using this, you no longer need to be in discord / twitter all day to catch certain hyped mints. You also have more confidence in these mints, as multiple discords will be linking / discussing them, thus showing hype and demand

How to use this page to gain an edge:

- Gain more confidence in the mints the discord alerts, especially during bull market times. Gain more confidence in holding runners, where the most profitable of which can get 3,800%+.
- View the meta of the NFTs, and try to analyze which meta are pumping the most, so you can mint the next similar one

Stacked Line Search

Compare multiple words (ie. multiple NFTs) against each other, using all the messages from the several Discords we pull from

How to use this page to gain an edge:

- Useful for plugging in several things in the morning, and seeing which NFT is most hyped
